A Kickstarter Tool Kit

Mobile Apps Automation

OPENSSOURCE

appium 2.x

Made it easy !!!!

This is an attempt to simplify
the ecosystem learning and adapt

By
reWire
fueled by decode

WHY?

- ✓ Major shift in Appium Server from 1.x TO 2.x , furthermore advancements in pipeline from the Opensource forum
- ✓ Appium Server 2.x opens new technology scope and expandability
- ✓ Understanding the significant changes in the ecosystem is crucial
- ✓ Opportunity to implement new drivers for different OS like TV / IOT , plugins to extend Appium feature
- ✓ Appium Client has evolved from 2.x to 9.x in the past 5 years and is ready for further advancement
- ✓ Simplify the ecosystem to cater to users
- ✓ A KICK STARTER TOOL KIT for quick test bed readiness, learning, exploration, and development

The above-mentioned reasons prompted the decision to publish this content to make it easier to absorb Appium advancements and further..

THIS IS WITHOUT ANY MOBILE CLOUD SOLUTIONS

Appium 2.x

What New ?

Driver Ecosystem

- New Drivers Additions
- Independent Drivers Development

Plugin Ecosystem

- New Integrations / Features
- Plugins Development & Distribution

What New Shift ?

- ✓ Expand Appium support by Core / anyone can develop and share drivers
- ✓ Make it easy to integrate with other technologies
- ✓ Remove support for incompatible drivers , methods & capabilities etc
- ✓ New Docs framework

A Kickstarter Tool kit follows …..

BASE

@Setup By Playlist

- Environment Readiness
- Appium 2.x Configuration

[@Setup Playlist]

BUILD

@Implement By Playlist

- Appium 2.x (New)
- Appium Inspector
- Client (Java & Python)
- Implementation

AUGMENT

@Expand By Playlist

- Build Plugins / Drivers
- Deploy
